HG scale away foam spray

Every day, sanitary ware is exposed to scale because water and scale go hand in hand. Scale leaves a dull haze on tiles, shower cubicles, plastic bath tubs, sinks, taps, worktops and in the toilet. HG "scale away foam spray" removes the scale haze quickly and thoroughly, leaving a brilliant shine.

Directions for use: Press the nozzle at the front side and turn a quarter. If you have used the bottle before, remnants of the liquid may be left in the nozzle, causing it to work less well when you reuse the bottle. Before reusing the bottle, we recommend you rinse the nozzle with hot tap water, e.g. by running the water through the air holes at the side of the foam pipe. Spray on HG "scale away" and allow some time for it to work. Then rinse off or remove with a damp cloth. If the deposit is stubborn, simply leave HG "scale away" to work for a little longer. However, no longer than 5 minutes and do not let it dry. Repeat the treatment as required. Regular cleaning with HG "scale away" prevents the build up of a layer of scale and your shower, bathroom or worktop will always look shiny and clean. Turn the nozzle a quarter backwards after use (blocking position).

Attention: Transport and store the bottle upright. Nowadays, sanitary appliances are not always resistant to acids. Before using this product, check the manufacturer's maintenance instructions for the sanitary appliances. Do not apply HG "scale away" on marble, or other types of calciferous natural stone or other non-acid resistant surfaces. For enamelled baths use HG "professional limescale remover" diluted 1:10 in water. Ventilate well during use. • Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu

Other problem- solvers from HG

HG liquid drain unblocker

Due to its unique composition this product is ready for use. Hot water is therefore unnecessary. All types of waste pipes can be unblocked without splashing or foaming. A capful poured down waste pipes is enough to remove unpleasant odours immediately.

HG super powerful toilet cleaner

The specially developed formula of HG "super powerful toilet cleaner" effectively removes all types of problem soiling, such as persistent scale, uric scale, or other types of deposits that are difficult to remove from the inside of the toilet pan, the neck of the toilet, or invisibly under the rim.

HG mould spray

Black mould stains can really be an eyesore. They often appear in silicon grout, cement grout in damp places, such as the shower, bathroom, cellar, garage etc. HG "mould spray" removes these stains quickly and efficiently.
