# HG® textile

## ironing spray

for all types of fabric, including silk

makes our ironing supple, soft and bouncy

**500 ml ℮**

## HG ironing spray

Ironing becomes a pleasure with HG "ironing spray". It enables you to iron even the most crinkly fabric types, such as silk, linen and viscose smoother than ever before. A perfect smooth result is obtained with natural fabrics and with synthetic fabrics. It also adds a fresh fragrance and makes it possible to iron at a lower temperature. That makes the fabric last longer, reduces power consumption and prevents the surface of the iron from getting dirty.

**Directions for use:** Turn the nozzle on the front a quarter turn. Set the iron to the right temperature for the type of textile being ironed. Gently shake HG "ironing spray", hold the bottle at a slight angle and spray the fabric from a distance of about 20 cm. Slightly moisten the fabric (moisten only very slightly for silk and wool). Then iron the laundry straight away until the desired result is achieved. Treat stubborn folds and creases twice. Turn the nozzle a quarter-turn after use (OFF).

**Attention: Transport and store the bottle upright.** Protect from frost.
